

WHO WE ARE

EnCana Corporation is one of North America's leading independent natural gas producers. EnCana operates in the United States under its subsidiary, EnCana Oil & Gas (USA) Inc. (EnCana USA) and coordinates its operations from its U.S. headquarters in Denver, as well as from field offices in the Wind River Basin and Jonah Field (Wyo.), the Piceance, Paradox and Denver-Julesburg Basins (Colo.), and the Deep Bosier and Barnett Shale Basins (Tex.). EnCana also actively explores for new resource plays through its New Ventures Business Unit.

OUR COMMITMENT

EnCana employs and contracts a team of more than 1,900 people in the U.S. Additionally, EnCana works with more than 500 third-party contractors in support of our operations. This team is guided by the principles of EnCana's Corporate Constitution, which sets the foundation for EnCana to build a high-performance, principled corporation. This goal will be accomplished by:

- Committing to benchmark practices in safety and environmental stewardship, ethical business conduct, and community responsibility.

- Following the principle's of Consultation, Communication, and Capacity Building to make a positive difference in the communities where we operate.

- Employing a workforce of strong character who can be counted upon to do the right thing.

In alignment with the values and principles embodied in EnCana's Constitution, EnCana's Corporate Responsibility Policy illustrates our Constitution in action and demonstrates its impact on decision making in the following eight key areas of commitment:

- Leadership Commitment
- Sustainable Value Creation
- Governance and Business Practices
- Human Rights
- Labor Practices
- Environment, Health and Safety
- Stakeholder Engagement
- Socio-Economic and Community Development

RESOURCE PLAYS

A Resource Play is an accumulation of hydrocarbons known to exist over a large areal expanse and/or thick vertical section, which when compared to a conventional play, typically has a lower geological and/or commercial development risk and lower average decline rate. EnCana's well-developed knowledge of these types of accumulations has allowed the company to build leading positions in areas such as the Jonah Field (Wyo.), Mamm Creek (Colo.) and Barnett Shale (Tex.).

ENCANA
energy for people

COLORADO

Piceance Basin

- EnCana is one of the largest and most active natural gas producers operating in western Colorado's Piceance Basin.
- EnCana operates more than 2,800 producing wells in the Piceance Basin.
- EnCana's wells in the Piceance Basin produce approximately 450 million cubic feet of gas per day (MMcf/d).

Paradox Basin

- EnCana operates 79 producing wells in the Paradox Basin.
- EnCana's wells in the Paradox Basin produce approximately 60 million cubic feet of gas per day.

Denver-Julesburg Basin

- EnCana operates 900 producing wells in the Denver-Julesburg Basin.
- EnCana's wells in the Denver-Julesburg Basin produce approximately 60 million cubic feet equivalent of gas per day.

WYOMING

Jonah Field

- EnCana is the most active natural gas producer operating in the Jonah Field, producing about 65% of the Field's natural gas.
- Natural gas production in the Jonah Field is approximately 690 million cubic feet per day.

Wind River Basin

- Currently, EnCana operates more than 400 producing wells in the Wind River Basin.
- EnCana's wells in the Wind River Basin produce approximately 54 million cubic feet of gas per day.

TEXAS

North Texas

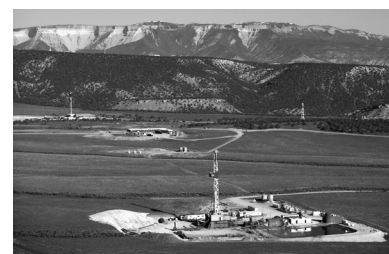

- Currently, EnCana has working interests in more than 755 producing wells and operates almost 707 of them.
- EnCana's wells in the North Texas produce approximately 39 million cubic feet of gas per day.

Deep Bossier

- Currently, EnCana has working interests in more than 39 producing wells and operates all 39.
- EnCana's wells in the Deep Bossier area produce approximately 264 million cubic feet of gas per day.

Texana

- Currently, EnCana has working interests in more than 1010 producing wells and operates 538 of them.
- EnCana's wells in the Texana currently produce over 132 million cubic feet of gas per day.

South Piceance Basin, Colorado

Jonah Field, Wyoming

Barnett Shale, Texas
